Clean & green on your screen

Capture critical client details from any device with Boulevard's HIPAA-compliant forms and charts.

Start from a template, or build from scratch
Hit the ground running with pre-built templates of common forms, or build your own with ease by dragging and dropping text, dates, checkboxes or dropdowns. Your clients or staff can add photos while completing a form or chart to capture those glow-ups!

Auto-send and complete from any device
Automatically assign and send out forms and charts for completion to your specifications.

Clients can complete forms from a browser on any device, and staff can choose between the Dashboard on desktop or the Boulevard Professional App (compatible with iPads and smartphones).

Update once, everywhere
Boulevard's forms and charts link to the client profile to update clients' birth dates, emergency contacts, allergies, and medications. Prepopulate charts with client information to save service providers time, and allow them to focus on making more moments that matter.

Advanced Charting

Mark up photos or diagrams to indicate treatment
Capture photos before treatment and mark them to indicate treatments and products. If you prefer not to photograph your clients, you can add a diagram for your service providers to mark up.

Review and sign off on forms and charts
Quality and compliance are critical to your business. Configure forms to flow from service providers to reviewers where they can add comments and sign off.
